

Step-By-Step guide for using the AIRPACT-FIRE Android App.

1.

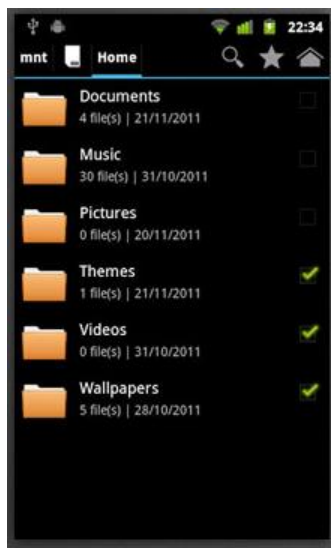

Download the APK onto your mobile device or emulator from

<http://76.178.152.115:8000/downloads/>

2.

Open your APK from the device's File Manager

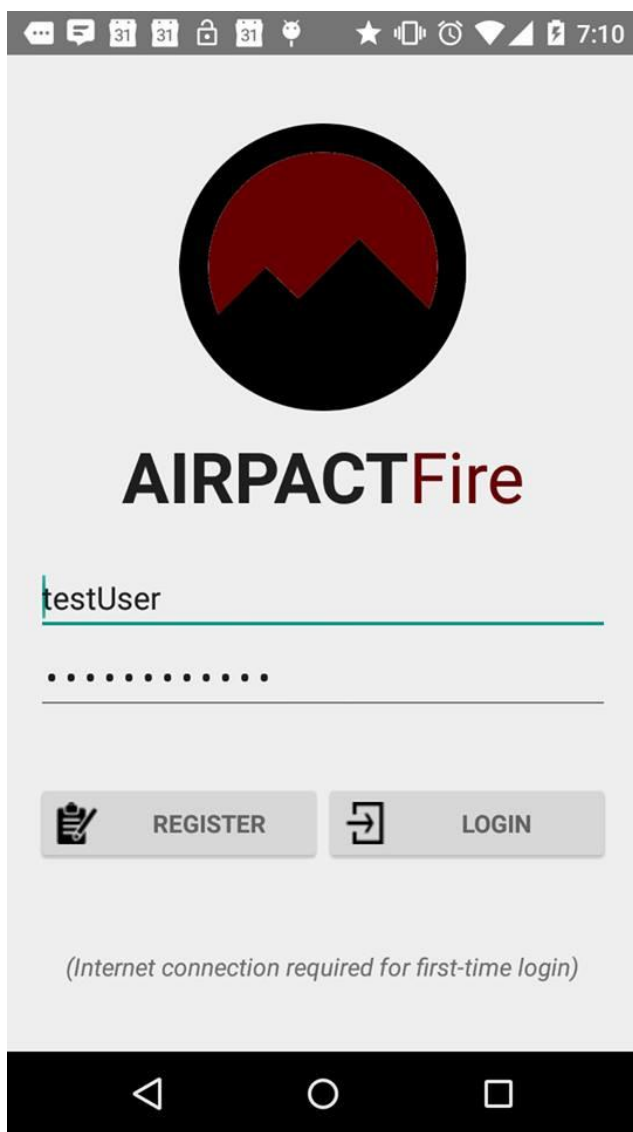

3.

Launch the Android App from your device.

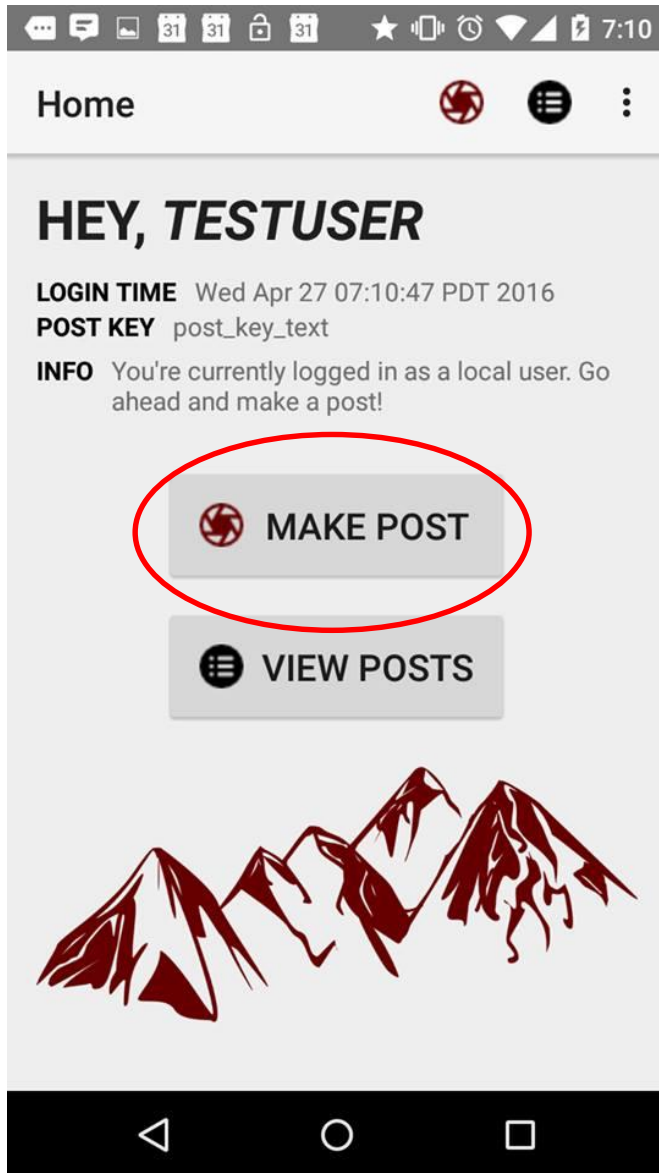

4.

After opening the Application, register if you haven't already and login from the details. You may need to be authenticated if a first time user.

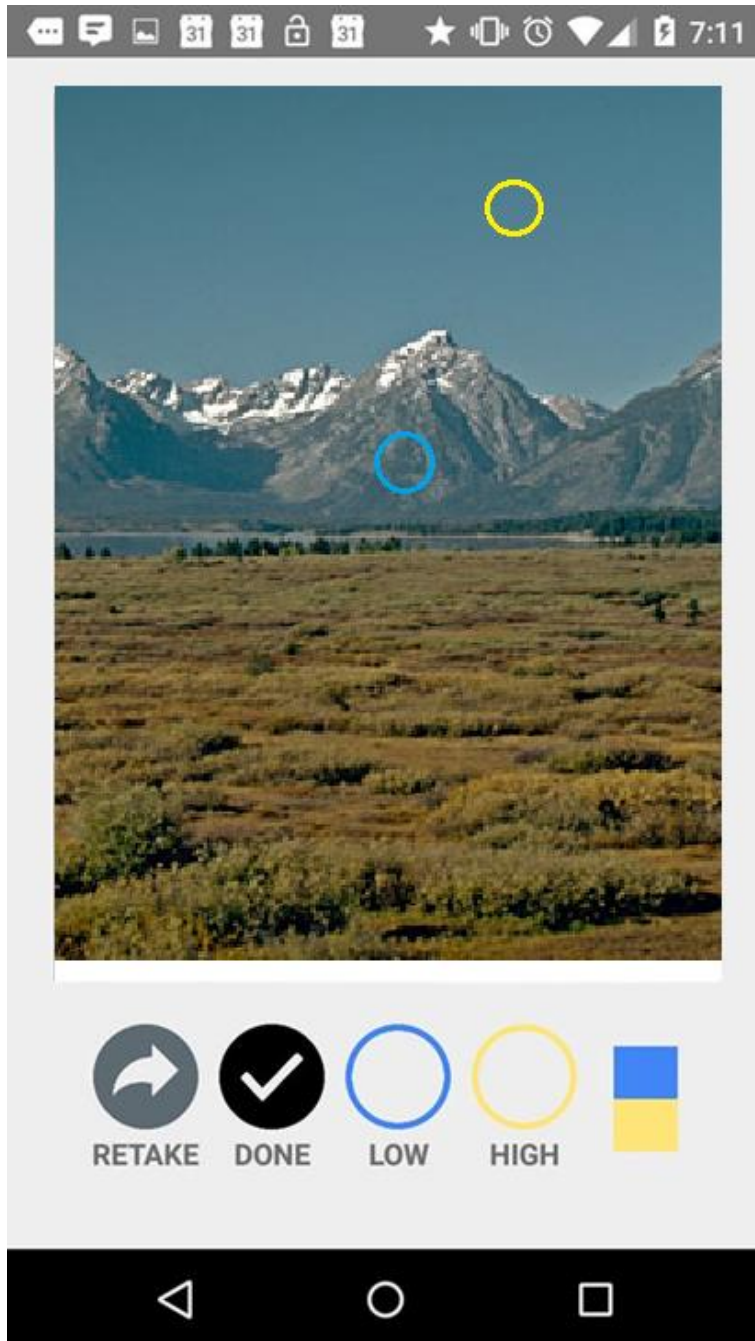

5.

After signing in, you are now able to take a picture with your device. Click the MAKE POST button to do so.

6.

Now you should drag the yellow circle (high brightness) to somewhere like the sky, and the blue circle (low brightness) to somewhere like the side of a mountain. After you have done both hit done.

7.

Lastly, it will show you the visual details, and the tag(s) you want to put on it, as well as your location and time. You may add a description, and then submit it, or queue it if you do not have access to the internet.
